JASON HOGAN

Senior Salesforce Administrator and Solutions Architect

St. George, Utah (Remote) | 435-261-2333 | jason@twiddlebox.io | linkedin.com/in/jason-hogan1 | github.com/jrhogan77

PROFESSIONAL SUMMARY

Senior Salesforce Administrator and solutions architect with 8.5 years of Salesforce experience across Sales Cloud, Service Cloud, CPQ, Commerce Cloud and CRM Analytics. Most recently led a two-person admin team supporting 500+ users for a global fitness brand, pairing declarative-first administration (Flow, security, data quality and documentation) with hands-on Apex, Lightning Web Components (LWC) and REST integration work, including an SAP address-validation integration. Known for cleaning up complex orgs, mentoring admins and translating business requirements into solutions that hold up in production. Uses custom AI models under a self-built governance framework to deliver faster without compromising security or governor limits.

CORE SKILLS

Administration: Sales Cloud, Service Cloud, Case Management, Permission Sets, Security and Access, Event Monitoring, Data Quality and Cleanup, Reports and Dashboards, User Management, UAT

Automation and Development: Salesforce Flow (Screen Flows, Subflows), Flow XML, Apex, Lightning Web Components (LWC), Custom Property Editors, Visualforce, SOQL, SOSL, Custom Metadata Types (CMDT), Invocable Actions

Integration and Data: Apex REST APIs, Callouts, SAP DQM, AWS, Jira and Slack, Postman, SFDMU Data Migration, Referential Integrity

Clouds and Products: CPQ, Commerce Cloud, CRM Analytics, Marketing Cloud, Experience Cloud, Agentforce, Einstein Next Best Action, Knowledge

DevOps and Tools: Salesforce DX, Gearset, Git and GitHub, PowerShell, Node.js, Python, Google Apps Script, Antigravity IDE

Practices: Solution Design, Business Requirements, Technical Design Documents, Admin Runbooks, Scrum and Agile, Team Mentoring, Prompt Engineering, MCP Server

CERTIFICATIONS

Salesforce Certified Administrator | Salesforce Certified Advanced Administrator | Salesforce Certified Platform App Builder | Salesforce Certified AI Associate

PROFESSIONAL EXPERIENCE

iFIT (NordicTrack, ProForm, FreeMotion) **January 2022 - May 2026**

Senior Salesforce Administrator (Admin Team Lead)

Global fitness brand with 500+ users across the U.S., Canada, Europe, Australia, New Zealand, Mexico and U.S. territories. Led 2 administrators in the U.S. and Europe, mentored 1 developer on declarative best practices, and assisted with the full Salesforce delivery lifecycle across 5 clouds.

- Led a 3-month data cleanup that removed 572,527+ records (11%) across 3 objects while keeping every related record intact.
- Found and fixed automation recursion, broken processes and poor performance, improving efficiency 20%+ while delegating fixes to build the admin team's skills.
- Concluded the declarative migration of the Canada and Australia business units into Salesforce, covering support processes, automation and case management.
- Architected an SAP DQM address-validation integration (DTO, invocable Apex and subflows) that standardizes and validates inbound addresses, with a Screen Flow for review and override.
- Built Lightning Web Components with Custom Property Editors, including a multi-target Smart Address Block configured through Custom Metadata Types for Flow screens and record pages.
- Built Apex REST endpoints, callout classes and DTOs so declarative Flows could pull and process data from external systems.
- Assisted with an Agentforce implementation alongside consultancy a360, covering knowledge articles, Einstein Next Best Action, layouts and production deployment, and translated the consultancy's deliverables into production-ready Apex and Flow.
- Built CRM Analytics event-monitoring recipes and dashboards that flag unauthorized access and data-ingestion risks before they affect operations.
- Migrated production data to sandbox across 33 interdependent objects with SFDMU and PowerShell automation, preserving referential integrity.
- Configured and assisted in maintaining Salesforce CPQ for a complex product catalog and pricing; in Commerce Cloud, configured pricing rules, discounts and promotions and built a Flow-driven order-confirmation email for a parts-ordering

portal.
- Updated large numbers of Flows directly in Flow XML, and built 2 complex Flows by directing custom AI models to produce valid Flow XML.
- Ran custom AI models in parallel on multi-stage projects under a self-authored AI engineering standards framework, and built a Python and Node.js MCP server that gives AI tools local file access.
- Built a one-click deployment notification tool and Google Apps Scripts for UAT tracking, Drive cleanup and document formatting.
- Wrote the documentation stack: technical design documents, UAT manuals, test scripts and admin runbooks.

TaskEasy / WorkWave **March 2020 - January 2022**
Salesforce Administrator

Supported 300+ Service Cloud users for a nationwide service provider, mentored by an 18x-certified Salesforce systems architect, and delivered development-level solutions.

- Designed and implemented Service Cloud from the ground up, setting best-practice foundations and data-integrity standards.
- Solely architected the Finance department's complex automations, increasing productivity 35-45%.
- Introduced in-house vendor-network support solutions, improving vendor turnover by 15%.
- Built a custom sprint board and ticketing system inside Salesforce, controlled by Permission Sets, so authorized users could submit and track Salesforce requests.
- Developed Visualforce pages and components and maintained AWS data integrations with Salesforce.

Monumetric **November 2019 - March 2020**
Salesforce Administrator - Jr. Developer

Primary point of contact for 50+ Service Cloud users.

- Researched and built a fully custom, in-house Slack and Jira integration with no third-party tools, alerting users by direct message with Jira status updates and reminders and reducing ticket resolution time by 25%.
- Identified and implemented a new Sales onboarding process with visual guidance for the Sales team, increasing surveyed publisher and customer satisfaction by 32% and reducing revenue attrition by 14% ($238K).
- Built reports, dashboards and processes to monitor Sales and Account team metrics, alerting reps and managers when KPIs fell below company standards.

PROJECTS

twiddlebox.io (Twiddle Box Development LLC) **2026 - Present**
Co-founder and Chief Executive Officer

- Co-founded with Kristina Hogan a software company building tools that let people create production Salesforce work without a development background.
- Lead architect and primary developer of a full-stack build spanning Apex, LWC, Flow XML and AI orchestration; core architecture is in place.

SELECTED SALESFORCE BUILDS

Apex: AccountSequenceRestService, AccountSequenceService, GetAccountSequenceAction, SmartAddressBlockController, PhoneInputController, SAP_AddressValidation and SAP_AddressData, each with its own test class

Lightning Web Components: smartAddressBlock and smartFlowFooter (each with a Custom Property Editor), smartNavButton, customPhoneInput, flowActionCard, flowValidationOverride, quoteNavigationHandler, accountCreationTab, screenFlowBanner and branded Flow headers

PROFESSIONAL ATTRIBUTES

Handles conflict with an intelligent, empathetic approach that brings out the best in difficult situations. Combines architect-level technical depth with a declarative-first mindset and a firm commitment to accurate, complete work, with the same standard whether anyone is watching or not.
